

features.

- **Panel Space:** 2U to 5U
- **Overall Depth:** 14" or 18"
- **Overall Width:** 19"
- **Description:** Rackmount shelf with vented base and custom-fit face plate provides a professional finish for non-rackmount gear up to 17.375"W.
- **Construction:** Made in the U.S.A. with 14-gauge certified U.S. steel. Hinged sides for fast installation, cost effective shipping. Black powder epoxy finish.
- **Custom Face Plate:** Face plate is made to fit your equipment and secure on standard E.I.A. spacing after the shelf has been mounted, covering mounting screws for a finished consumer-style appeal.
- **Installation:** Four L-brackets (typically 2 on top front and 2 on bottom rear vents) secure equipment to shelf, preventing it from being pushed back during use. Face plate mounts separately after shelf has been secured to rack.
- **Load Capacity:** 50 lbs.
- **Ordering:** Because this is a custom product, equipment measurements must be provided to determine correct fit.

2. Download template from website (lowellmfg.com) and record measurements of your equipment. Send the measurements and partial model number of desired shelf to Lowell Engineering:

- Fax: (888) 456-9355
- E-mail: info@lowellmfg.com

Alternately, you can ship the equipment to Lowell to ensure accuracy. Equipment will be shipped back within 2 business days.

- Lowell Manufacturing Co., Attn: Engineering
100 Integram Dr., Pacific, Mo., 63069

- **Optional:** (order separately)

- **RMK-TCMP:** 17.35"W top clamp secures equipment less than 16.125"W.
- **RMK-RBKT-14:** Pair of 11.5" rear extension brackets (for 14"D shelf) extend to rear rails in 22"D or 27"D racks.
- **RMK-RBKT-18:** Pair of 15.5" rear extension brackets (for 18"D shelf) extend to rear rails in 22"D, 27"D, or 32"D racks.

1. Select height/depth of shelf from chart below and note the (partial) model number.

a&e specifications.

The 19"W steel shelf with custom face plate shall be Lowell Model # _____ with overall depth of _____ (14", 18") and panel space of ____ (2, 3, 4, 5) rack units. The shelf shall be 14-gauge U.S. steel construction with black powder epoxy finish and have a load capacity of 50 lbs. The face plate shall mount after

the shelf and shall be custom fabricated to fit customer-supplied equipment Model # _____.

Custom face plate is fabricated to fit your equipment for a professional appearance.
