

Sound Masking Speaker #SM820A

includes speaker, transformer, enclosure, grille, hangers w/chain for sound masking applications

Hangers can be reconfigured to aim the speaker down or sideways.

Model #SM820A:

- UL1480 General Signaling (USA)
- UL2043 Return Air Plenum Space
- CSA C22.2 No. 205-M1983 General Signaling (Canada)

In general, the purpose of a sound masking system is to provide for greater conversational privacy and productivity, in an open-office environment, by adding ambient noise and shaping the noise signal to mask speech. The noise signal is fed from a specially designed sound masking generator, and amplifier, to the sound masking speakers. These speakers are typically positioned out-of-sight above ceiling tiles in plenum space, although speakers with white enclosures are sometimes used in open architecture truss type ceilings. Sound masking speakers, generators, and amplifiers are sold separately.

features.

- **Description:** Model #SM820A ships assembled and ready-to-install. It features an 8" coaxial driver, wired transformer, black steel enclosure with grille, and mounting hardware which includes wire hangers, S-hooks, and a chain.
- **Features:**
 - **Driver w/transformer:** 8" 50W coaxial driver (polypropylene LF cone, 20oz.LF and 2oz. HF magnets) and factory-wired 70V transformer. Primary taps: 0.25, 0.5, 1, 2, and 4W. An externally accessible rotary knob allows convenient tap selections, especially useful when balancing the masking speaker system. Selector switch includes "off" position.
 - **Enclosure w/grille:** The 760 cu.in. (11.625"H x 11.625"W x 5.625"D) steel backbox is acoustically lined with fiberglass and features externally accessible input leads, SG handibox cover with dual combination (3/4", 1/2") knockouts for flex conduit, and 1/2" Romex connector for installations without conduit. Perforated steel grille. Black powder epoxy finish.
 - **Mounting hardware:** Pre-mounted wire hangers promote fast installation with easy positioning of the speaker for upward sound dispersion. Hangers can be reconfigured to aim down or sideways. Hangers are formed of rigid, plated wire for stable, kink-free suspension from the structural deck using S-hooks and 4' chain (included). If not used for installation, remove the hangers to prevent rattling.

Note: Rigging hardware, to attach the speaker to the building structure, is not included and is to be furnished by the installer. The masking speaker system must be mounted in accordance with local, state, and federal codes and regulations and industry standard practices.

- **A&E Specifications:** The sound masking speaker assembly for suspended ceiling installations shall be Lowell Model #SM820A, which shall include an 8" 50W coaxial driver with factory-wired transformer mounted in a 760 cu.in. steel backbox with grille and externally accessible speaker leads. The wired transformer shall be 70V with primary taps at 0.25, 0.5, 1, 2, and 4W. The assembly shall include an externally accessible rotary switch to adjust tap selections and include an "off" position. Speaker leads shall exit through a strain relief clamp on a single gang handibox cover. Enclosure and grille shall have a black finish and include pre-mounted wire hangers with separate S-hooks and 4' chain. The speaker shall be made in the U.S.A. with certified U.S. steel and global components.

Rigging hardware, to attach the chain to the deck or other building structure, shall be furnished by the installer.

SM Series Summary

Model No.	Driver	Transformer	Enclosure Size	Enclosure Style	Enclosure Color	Grille Color	Mtg. Aids
▶ SM820A	8" 50W coaxial	70V 4W	760 cu.in.	Square	Black	Black	Hangers, S-hooks, chain
SM820A-BR	8" 50W coaxial	70V 4W	760 cu.in.	Square	Black	Black	Bridge rails
SM810A	8" 15W dual cone	70V 4W	760 cu.in.	Square	Black	Black	Hangers, S-hooks, chain
SM810AW	8" 15W dual cone	70V 4W	760 cu.in.	Square	White	White	Hangers, S-hooks, chain
SM810A-BR	8" 15W dual cone	70V 4W	760 cu.in.	Square	Black	Black	Bridge rails
SM410A	4" 15W single cone	70V 4W	760 cu.in.	Square	Black	Black	Hangers, S-hooks, chain
SM410A-BR	4" 15W single cone	70V 4W	760 cu.in.	Square	Black	Black	Bridge rails
SM805A	8" 12W dual cone	70V 4W	325 cu.in.	Round	Black	Black	Hangers, S-hooks, chain

Note: Speakers with white enclosures or factory-mounted bridge rails are made to order. All square speaker assemblies feature pre-drilled pilot holes to allow field installation of bridge rails #SM-BR, which include 6 black sheet metal screws. If field-installing bridge rails, remove wire hangers to prevent rattling.

drawings

Measurements are inches unless noted otherwise.

Code Note: The masking speaker system must be mounted in accordance with local, state, and federal codes and regulations and industry standard practices. In some areas of the country, code may require that the masking speaker be physically attached to the ceiling grid. In that case, sheet metal screws (furnished by the installer) may be attached through holes provided in end caps of SM-BR bridge rails through the ceiling grid. In other areas, code may require seismic restraint cables be installed between the building structure and masking speaker. Holes are also provided in SM-BR rails to attach seismic restraint cables to the speaker assembly (restraint cables and hardware to be furnished by the installer)
