

Model No.

# ES-8TSUB

In-Ceiling Speaker

**INCLUDES:**

- 8-inch 120W subwoofer driver
- 120W transformer (with bypass)
- Steel enclosure (with dog ears)
- Press-fit grille, scrim, pull-tool
- C-ring with support rails
- Cardboard template for cut-outs
- Plastic paint shield for driver

RECESSED SUBWOOFER produces extended low-frequency response making it ideal for retail, commercial and industrial applications when used in combination with other ES Series speakers. The self-contained subwoofer is for in-ceiling installations.

## FEATURES

**PERFORMANCE:** Suitable for applications that require a subwoofer for extended low-frequency response.

**DRIVER:** 8-inch 120W subwoofer

- Omni-directional dispersion

**TRANSFORMER:** 120W

- Tap selections for 25V, 70V or 100V speaker systems
- 8ohm transformer bypass position
- Selector switch behind grille

**CROSSOVER:** High efficiency passive low-pass crossover network removes unwanted high frequencies from the subwoofer and provides low frequency response down to 57Hz ( $\pm 6$ dB). The built-in passive crossover eliminates the need for an active crossover and dedicated amplifier to power the subwoofer.

**GRILLE:** Fine mesh steel press-fit grille with white finish, scrim and pull tool.

**ENCLOSURE:** Factory-mounted enclosure ships attached to the driver (non-removable).

- Durable 20-gauge steel with grey finish.
- Ported enclosure tuned for extended bass response
- Built-in reversible mounting dogs aid fast installation, while allowing the speaker to mount in drywall, wood, tile or almost any type of ceiling with thickness up to 3.4 inches (86.4mm).
- Removable (4 pin) Phoenix-style connector with 2 terminals for input to speaker and 2 parallel terminals for output to next speaker in string.
- Seismic restraint ring tie-point on rear
- Internal volume 900 cu.in.

**BAFFLE:** Low-profile front baffle formed from UV-rated high impact plastic.

**C-RING & SUPPORT RAILS:** Ring reinforces edge of drywall ceiling cut-outs and works with the two support rails to help distribute weight of speaker assembly to help prevent sagging tiles in lay-in tile ceilings.

**TEMPLATE:** Cardboard template to properly mark ceiling cut-outs for mounting holes.

**PAINT GUARD:** Plastic shield fits over the driver to protect it when baffle is painted.

**COMPLIANCE:**

- UL1480A General Signaling, USA
- UL 2043 Return air plenum space
- CSA C22.2 No.205-12 General Signaling, Canada

## ACCESSORIES (order separately)

- **ES-8-RIB Rough-in Bridge:** Galvanized steel bridge serves as a placeholder for a speaker in new construction (drywall or plaster ceiling) before finished ceiling is installed.

## FEATURES

Enclosure dog ears help to speed in-ceiling installations.

Front tap selector switch is protected behind the press-fit grille.

Fine mesh CRS white grille presses into position.

C-ring and support rails help distribute speaker assembly weight.

Plastic shield is included to protect driver if baffle is painted.

Use cardboard template to mark ceiling or wall cut-outs.

## TECHNICAL DRAWINGS

Dimensions are inches and [mm] unless stated otherwise.

## SPL VS. FREQUENCY (1W/1M)

## IMPEDANCE

Impedance reading expected from a typical 1kHz impedance meter is 9.5 ohms with the selector switch in the 8 ohm position.

TEST METHODOLOGIES: Lowell speaker systems are thoroughly tested to provide specifiers and contractors with accurate data. Test equipment includes the GoldLine TEF-20 analyzer.

- **POWER HANDLING:** specification is based on E.I.A. Standard RS-426B.
- **FREQUENCY RESPONSE:** describes the usable response range defined by a  $\pm 6$ dB window, which is useful in predictive engineering calculations.
- **SENSITIVITY:** is a computer calculation of the log average sound pressure level (SPL) over the entire engineering bandwidth as given in the Frequency Response ( $\pm 6$ dB).
- **MAXIMUM SPL:** is calculated based on the Power Handling and the measured log average Sensitivity where Maximum SPL = (Sensitivity @ 1W1M) + 10 log (Power Handling).
- **DISPERSION ANGLE:** is defined as the angle of coverage that is no more than 6dB down from the on-axis value averaged over the 2kHz octave band. Since speech intelligibility is dependent upon the 2kHz octave, this specification is useful in designing voice reinforcement and music systems that provide even coverage and intelligibility. The polar plots illustrate how the system performs when hung in free space ( $360^\circ$ ) or half-space ( $180^\circ$ ) in the case of a recessed speaker.

## TECHNICAL DATA

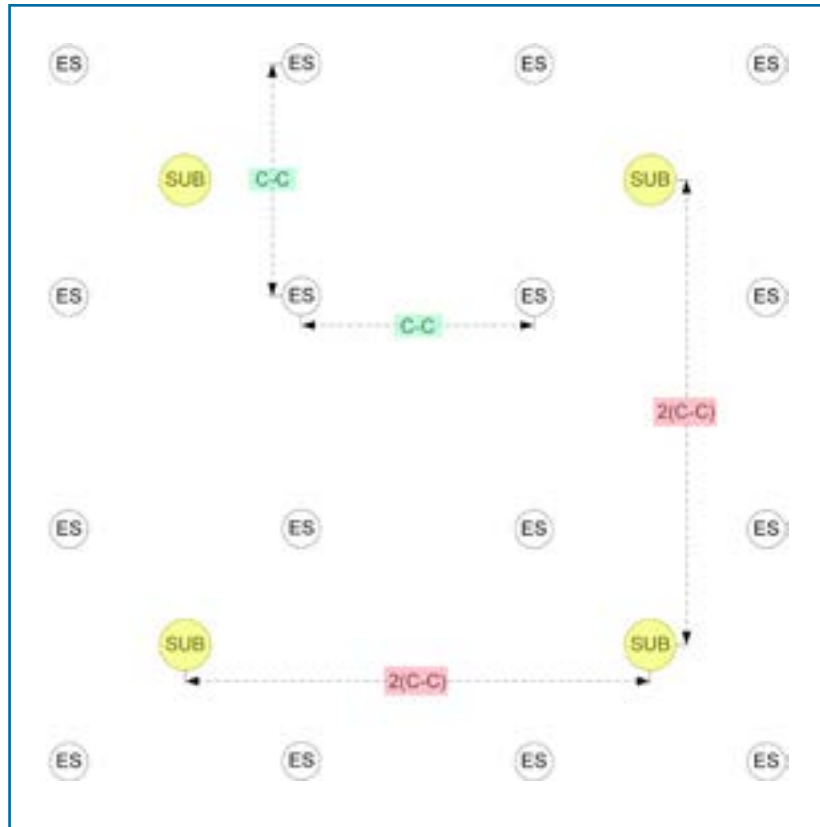

PERFORMANCE:	Power Handling . . . . .	120W RMS (at 8 ohms) measured per EIA Standard RS-426B
	Sensitivity . . . . .	90.2 dB log average SPL (at 8 ohms) @1W/1M over the frequency response range, measured in half-space.
	Maximum SPL . . . . .	111.0 dB (calculated based on power rating and measured 8 ohm sensitivity).
	Impedance . . . . .	8 ohms (nominal)
	Frequency Response . . . . .	57Hz – 138Hz (±6dB)
	Dispersion Angle . . . . .	Omni-directional
	Low Pass Crossover . . . . .	250Hz, 2nd order, 12dB per octave
	Transformer Taps . . . . .	100V (120, 60, 30, 15W); 70V (120, 60, 30, 15, 7.5W); 25V (15, 7.5, 3.75, 1.88, 0.94W)
PHYSICAL (Full Range Speaker):	Woofer Cone . . . . .	Coated paper cone
	Surround . . . . .	Rubber
	Woofer Magnet Weight . . . . .	29.2 oz. (828g)
	Woofer Voice Coil Dia. . . . .	1.5-in. (38mm)
MECHANICAL:	Input Terminals . . . . .	4-conductor removable Phoenix-style connector
	Net Weight (speaker & grille) . . . . .	16.6 lbs. [7.53kg]
	Shipping Weight (pair) . . . . .	47.7 lbs. [21.6kg]
MOUNTING:	C-ring . . . . .	One included per speaker
	Support Rail . . . . .	Two included per speaker

## A&E SPECIFICATIONS

The subwoofer shall be Lowell model ES-8TSUB, which shall include a high-performance 8-inch subwoofer driver, ported bass reflex enclosure and press-fit grille for recessed ceiling installation. Frequency response shall be 57Hz-138Hz (±6dB). Sensitivity shall be 90.2dB log average @1W/1M over the frequency response range, measured in half-space. The speaker shall be constructed of a coated paper cone with rubber surround. The woofer magnet weight shall be a minimum of 29.2 oz. (828g) and the woofer voice coil diameter shall be 1.5-in. (38mm). The transformer shall have primary taps for 100V (120, 60, 30, 15 watt); 70V (120, 60, 30, 15, 7.5 watt); and 25V (15, 7.5, 3.75, 1.88, 0.94 watt) with a selector switch mounted on the front under the grille that will include an 8ohm transformer bypass position. The factory-mounted enclosure shall be 20-gauge steel (painted grey) with internal volume of 900 cu.in. It shall have a seismic restraint ring tie-point on the rear for use where required by code or ordinance. It shall feature five dog-mount ears that allow it to be mounted in a ceiling with a maximum thickness of 3.375 in. (85.7mm). A template shall be provided to assist in cutting mounting holes. A rear access cable or flexible conduit entrance strain relief shall be provided with a termination cavity that encloses a four-pin Phoenix-style connector. The connector shall include two terminals for input to the speaker and two parallel terminals for output to the next speaker in the string. The system shall include a C-ring for use in reinforcing the edge of drywall ceiling cutouts, or for use with the included support rails to guard against ceiling tile sag from speaker weight. Front baffle shall have a diameter not more than 12.89-in. (327.45mm). The unit shall also include a press-fit, fine mesh 20-ga. CRS grille with UV rated powder coating (epoxy white), and shall include a thin piece of white scrim and a grille-pulling tool.

## TYPICAL SUBWOOFER SPACING

**KEY**

ES: Typical full-range ES Series speaker

SUB: ES-8TSUB subwoofer

C-C: Typical ES speaker center-to-center spacing

2 (C-C): Typical ES-8TSUB subwoofer center-to-center spacing

Note: It typically requires four times as many speakers as subwoofers.

## ES SERIES OVERVIEW

Model No.	Driver	Transformer*	Overall Depth	Overall Diameter	Net Weight	Color	System Specs (measured half space)		
							Sensitivity**	Frequency Response	Dispersion***
ES-4T	4" 25W dual cone	16W	6.22"	8.27"	4.1 lbs.	white	85.7 dB	108Hz–20kHz (±6dB)	175°
ES-52T	5-1/4" 30W coaxial	16W	10.16"	9.84"	6.5 lbs.	white	88.0 dB	70Hz–20kHz (±6dB)	165°
ES-62T	6-1/2" 50W coaxial	32W	10.16"	9.84"	7.5 lbs.	white	88.6 dB	64Hz–20kHz (±6dB)	120°
ES-82T	8" 120W coaxial	120W	11.03"	12.89"	14.6 lbs.	white	90.0 dB	64Hz–20kHz (±6dB)	105°
ES-82CDT	8" 150W coaxial compression	120W	11.03"	12.89"	18.0 lbs.	white	91.5 dB	67Hz–20kHz (±6dB)	70°
ES-8TSUB	8" 120W subwoofer	120W	11.03"	12.89"	16.6 lbs.	white	90.2 dB	57Hz–138Hz (±6dB)	omni-directional

THIS SPEC

\* Includes transformer bypass position

\*\* Average Sensitivity: SPL @ 1W/1M

\*\*\* Conical Dispersion @ 2kHz octave (–6dB)

Notes: Overall Depth includes grille and enclosure. Overall Diameter includes trim ring. Net Weight includes speaker, enclosure, grille (no installation aids). ES Speakers are sold in pairs.

**Note on Speaker Spacing:** Conical dispersion measurements are provided for comparison with other speakers. To determine correct speaker spacing, see the technical paper "Distributed System Speaker Spacing for the Integrator" (free download at [www.Lowellmfg.com](http://www.Lowellmfg.com)) which explains the difference between conical and linear dispersion and the measurements to use for best results. For quick calculations, a speaker spacing calculator is also available online under [Resources / Interactive Tools](#).
