# NOW BRINGING EXCEPTIONAL PERFORMANCE TO OPEN SPACES

Introducing the acoustic match to ES Series in-ceiling speakers — the new ESP line of pendant-mount speakers which uses the same drivers and transformers that provide excellent intelligibility for speech and full frequency response for music. The new pendants are extremely versatile with an integral bracket that's ready to hang from cable or pipe, plus threaded insert points to add a special U-bracket and surface-mount to a wall or truss. By combining ESP Series pendants with ES Series recessed speakers, integrators can achieve the same sound quality throughout a building—no matter the type of architecture encountered.

**CLEAN AESTHETICS** — Tapered black or white ported enclosure with magnetic-mount top to hide wiring and rigging hardware

**VERSATILE MOUNT** — Hang with cable or pipe, or add the special U-bracket to surface-mount to wall or truss

**EXCEPTIONAL PERFORMANCE** — 8" 150W coaxial compression driver, 8" 120W coaxial driver, 6.5" 50W coaxial driver

## MOUNTS 3 WAYS\*
