UPSVLI Series

UPSA6-850

Uninterruptible Power Supplies

Online, Line Interactive & Standby UPS

PROTECT CRITICAL

DATA and EQUIPMENT while

supplying reliable power.

UPS0424-BR500

UPS9LI Series: Online UPS with lithium-ion batteries provides robust protection for mission-critical light industrial applications.

- Lithium Iron Phosphate batteries (LiFePO4) eliminate battery maintenance and refresh needs of UPS with lead-acid batteries, providing more than twice the service life, higher temperature tolerance, longer internal runtimes and faster recharge.
- Up to 10 year battery lifespan.
- Online double conversion technology provides the cleanest power in the most challenging conditions including edge computing and light industrial.
- Battery management system provides over voltage, over current and over temperature protection
- Power rating: 1500VA, 2000VA and 3000VA
- 6 year warranty on electronics and battery
- UL, cUL, RoHS

UPSVLI Series:
Line Interactive UPS with lithium-ion batteries for longer life with reduced cost of ownership.

- Lithium-ion batteries provide better performance at higher temperatures.
- Pure sine wave output
- Redundant battery management systems — protection from over-charge/discharge
- Fast recharge — recharge batteries in about 60 minutes after full discharge.
- Easy to replace battery design
- Power rating: 700VA, 1000VA, 1500VA
- 5 year warranty on electronics and battery
- UL, cUL, RoHS, TAA compliant

UPSV Series: Value Line Interactive UPS with lead acid batteries protects equipment from power problems while supplying clean, reliable network grade power.

- Combines high performance with value pricing
- Auto restart after full battery discharge
- Ideal for home or small office
- Pure sine wave output
- Power rating: 700VA, 1000VA, 1500VA, 2000VA
- 3 year warranty on electronics and battery
- UL, cUL, RoHS

UPS8 Series: Line Interactive UPS with lead acid batteries provides advanced protection for servers and network equipment.

- Highest efficiency available providing utility cost savings at all load levels.
- Pure sine wave output
- Hot swappable battery — easy to replace without interrupting the load
- Temperature compensation charging to prolong battery life
- Power rating: 800VA, 1100VA, 1500VA, 2000VA, 2200VA, 3000VA
- 3 year warranty on electronics and battery (optional 5-yr.)
- UL, cUL, RoHS

UPS9A Series: Online UPS with lead acid batteries provides premium power protection for mission critical applications.

- Online double conversion technology, power conditioning and outage protection.
- Multiple communications capability with optional web/SNMP or relay/dry contact cards.
- Power rating (2U units): 1000VA, 1500VA, 2000VA and 3000VA
- Power rating (1U unit): 1000VA
- Up to 98% efficiency (ECO mode) lowers energy consumption
- 3 year warranty on electronics and battery (optional 5-yr.)
- UL, cUL, RoHS, TAA compliant

UPS6LI Series: Standby UPS with lithium-ion batteries in a slim, lightweight chassis provides power outage protection where a conventional UPS will not fit.

- Ideal for video walls, automation systems, kiosks, point-of-sale equipment and similar applications
- Operates at up to 98% efficiency, saving utility costs and reducing heat output
- LiFePO4 batteries provide protection for up to 8-10 years or 2000 discharges
- Mounting brackets for wall, under counter or inside enclosures
- Power rating: 350VA, 600VA
- 5 year warranty on electronics and battery
- UL, cUL, RoHS, TAA compliant

Model UPSA6-850:
Standby UPS with lead acid batteries provides affordable, reliable power protection for home and small business electronics.

- Maintain internet connections during power outages
- USB charging port lets you charge mobile devices during power outages
- Touch LCD provides vital monitoring and precise information
- Power rating: 850VA
- 3 year warranty on electronics and battery
- UL, cUL, TAA compliant
